

# The Best of the Best

BY THE EDITORS OF MOTOR

two- or four-line displays of some scan tools. A nice touch is that the definition of each term is right on the display, so you don't have to go to a reference book.

The CJ-II can graph two PIDs simultaneously, so if you want to take it on the road and grab, say, MAF and rpm, or TPS, it's a simple job with a tool you can tape to the steering wheel and read easily.

The PDA can be loaded with the CJ-II software from a disk included with the OBD II cable, and universal smart connector, which includes the OBD II module. Updates can be downloaded from any Internet-capable PC to the PDA using cradle or cable (setup depending on however the PDA communicates with a PC).

### **E-WINS Diagnostic Suite** by EASE Diagnostics

EASE Diagnostics returns to the winner's circle this year with another powerful diagnostic weapon. This time it's really an arsenal of tools rolled into a potent megasystem. E-WINS,
